This diagram shows an exploded perspective view of a multi-bay electronic chassis assembly. The main chassis body is labeled 201. It features a front panel with multiple bays. A vertical support structure, labeled 204, is positioned within the chassis. Various components are shown in their relative positions for assembly:
 

- 202: A component, possibly a power supply or filter, located at the top rear of the chassis.
- 203: A component, possibly a fan or cooling unit, located at the top front of the chassis.
- 205: A component, possibly a control panel or display, located at the bottom front of the chassis.
- 206: A component, possibly a connector or interface, located at the bottom left of the chassis.
- 207: A component, possibly a connector or interface, located at the bottom right of the chassis.
- 208: A component, possibly a connector or interface, located at the bottom center of the chassis.
- 209: A component, possibly a connector or interface, located at the bottom center of the chassis.
- 210: A component, possibly a connector or interface, located at the bottom center of the chassis.
- 211: A component, possibly a connector or interface, located at the bottom center of the chassis.
- 212: A component, possibly a connector or interface, located at the bottom center of the chassis.
- 213: A component, possibly a connector or interface, located at the bottom center of the chassis.
- 214: A component, possibly a connector or interface, located at the bottom center of the chassis.
